

FIDS - Flight Information Data System

Advertisers around the world have realised the value of airport advertising. Queues and waiting times mean airport passengers and visitors alike are viewing messages repeatedly and for longer periods. By advertising alongside vital information such as arrival and departure times, you are guaranteed exposure to a captive audience of thousands of people weekly.

	1920 x 1080 pixels Static Images JPEG files only RGB format
	Animated Files 1920 x 1080 pixels MP4 or .mov files only

Rates
